Samsung split ac remote manual

When do you change the battery? When the battery is almost complete, an icon appears on the remote control display. When the icon appears, replace the batteries. The remote control requires two 1.5 V triple A batteries. If you haven't used the remote control for a long time, remove the batteries from the remote control itself and save it. How do I insert batteries? Follow these steps: Image not available forColor: 1 2 Contents 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 Picture not available forColor: With Samsung air conditioning remote control, enjoy different modes and features. Every single touch leads you to a very cold and comfortable life. These instructions apply to different models. The exact characteristics and functions of the air conditioner may differ from those described. For further instructions and functions, refer to the product's operating instructions. Check out the basic features of Samsung's air conditioning remote control. You can manage various functions with the remote control, and this will help make your stay even cooler and more comfortable. Note: The actual design of the remote control may vary depending on the model you have. Set the temperatureClim to expand How to set step 1. To control the temperature in each mode, press the temperature button (+, -). Step 2. Select and change the temperature mode as Automatic, Cold, Heat, Dry, Fan. Tips Auto, Cool, Heat: Set 1 °C from 16°C to 30°C; Dry: Set 1 °C from 18 °C to 30 °C; Fan: No temperature control. Note: The actual design of the control panel may differ from your model. The lowest setting temperature of the remote control may vary by country. Automatic modeClick to expand You can use automatic mode to perform a powerful cooling or heating function to automatically reach the desired temperature. After the difference between the room temperature and the set temperature has fallen, the air conditioner controls the fan speed and the direction of airflow. When the room temperature is higher than the set temperature, the air conditioner automatically creates cool air. When the room temperature is lower than the set temperature, the air conditioner automatically creates warm air. Note: The actual design of the control panel may differ from your model. Cool modeClick to expand How to set step 1. Press the Mode button and select Cool. Step 2. After selecting Cool mode, you can also select the desired function, temperature and fan speed. Tips To cool faster, select a lower temperature and a higher fan speed. To save energy, select a higher temperature and slower fan speed. When the room temperature is close to the set temperature, the compressor motor slows down to save energy. It is recommended to keep the temperature difference between indoor and outdoor air within 5 °C for convenience. Note: The actual design of the control panel may differ from the Model. Dry mode (Dehumidification)Click to expand Dry Mode to function as a dehumidifier by removing moisture from the indoor air. This will help you in rainy or humid weather. The outdoor unit shall be repeatedly and automatically switched on/off for maximum dehumidion according to the current temperature difference and the required temperature. Therefore, when the outdoor unit is working, cool air can come out of the indoor unit. Tips Press the Mode button and select Dry to use the function on the remote control. The correct set temperature range for dehumidion is 24 °C to 26 °C. If you feel that the current humidity appears to be high, use a lower set temperature. Note: The actual design of the control panel may differ from your model. Dry mode is not for heating. Fan modeClick to expand Fan mode you can use to start the air conditioner as a floor fan that provides a breeze into the room without heating or cooling. Note: The actual design of the control panel may differ from your model. Adjust the direction of airflowClick to expand You can adjust the direction of airflow. Press the Airflow button to select the desired airflow direction. In addition, you can keep the air flowing in a constant direction by stopping the movements of vertical airflow blades. Tips If you manually adjust the vertical airflow blade, it may not close completely when you turn off the air conditioning. Always use the remote control to adjust the air flow blades. Do not move the blades manually. Then they must not function normally. When good'sleep is turned on, you cannot control the vertical direction of airflow in Cool mode. Note: The actual design of the control panel may differ from your model. Some remote controls have airflow function buttons, but product models may not have the corresponding functions themselves. Display lighting functionClim to expand You can turn display lighting on and off with display lighting. Press the Options button on the remote control and select View. Then press set. Tips Even if you change the current mode or function when the display lighting feature is turned on, the display lighting is turned on again when the product restarts. The new QMD 2020 changes its current mode or function when the display lighting function is turned on, and then the display light lights up for five seconds and then turns off again. To turn off the display lighting function, restart the above method or turn the product off and on. The display lighting feature specializes in some limited models, but may differ from the model. Timed on /off Click to expand It is very convenient to use the on/off function to turn the air conditioning on or off after the set duration. You can schedule the duration before the air conditioner turns on or off, and this will help you use the air conditioner economically. How to set up Step 1. Press turn on the air conditioning, and select the On button. Step 2. Press the select button to set the desired time, and then press set. Step 3. Press the Power button to turn on the air conditioning and press the Timer button to select Off Step 4. Press select to set the desired time, and then press set. Tips To turn off on/off time, set the duration to 0.0. You can set the duration to 0.5 hours to 24 hours. You cannot set the same duration for both timed and timed off functions. When you start Timed Off, a timer indicator appears on the display of the internal unit. Note: The actual design of the control panel may differ from your model. Additional tips for using the remote controlClimited to expand the more efficient way of use It is recommended to maintain a 10 m distance between the internal unit and the remote control. For better and smooth electrical communication, use the remote control towards the direction of the internal unit. Replacing the remote control batteries When the battery is almost complete, an icon appears on the remote control display. Low batteries are also shown on the display indoors. The remote control requires two triple-A 1.5 V batteries. Note Do not harvest, shake, be weight or attempt to disassemble the remote control. If you haven't used the remote control for a long time, it's a good way to remove the batteries from the remote control. After replacing the batteries on the remote control, all modes are reset. When replacing the remote control batteries, keep them out of the reach of infants. If the child eats the battery, contact a doctor immediately. immediately.
